

# TutorsBox

## PERSISTENT CLASSES

TutorsBox automatically saves your classes for you and your students to review. Your students get to go over tough areas again without using your tutoring hours, and you can look back to see what works and what doesn't.

## FULLY INTEGRATED MATH & SCIENCE TOOLS

With an equation editor, visual graphing tools, and Wolfram Alpha support built in, TutorsBox gives you what you need to convey complicated math and science content.

## NEW! ON-BOARD AUDIO & VIDEO

TutorsBox integrates audio and video, so you don't need to use a separate tool to communicate with your students. No more Skype chats on the side or phone minutes used during tutoring sessions.

## Online Whiteboard

Looking for an easy-to-use online whiteboard so you can show complex concepts to your students? TutorsBox offers a low-cost solution that integrates smooth writing tools, math and science support, and on-board audio.

Tutors can purchase monthly credit packages — no longterm contracts — to use the service for the amount of time they need. And planning time doesn't count against the time you've purchased, so you can focus on using that time with students, not prepping.

The solution works on nearly any device and any web browser, so you won't have to ask students to download plug-ins or software to use your services.

- ✓ **Cloud-based and device agnostic:** TutorsBox online whiteboard works with nearly any web browser online. No software to download and install. NoFlash errors on mobile devices.
- ✓ **Prep time is free:** No matter what level of access you purchase, only time spent tutoring counts against your allowance.
- ✓ **Sessions are persistent:** Refer students back to saved tutoring sessions if they need to review — you don't have to repeat the same subject matter with students.

"The heavy math ability is what initially attracted us. The fact that TutorsBox uses LaTeX to provide mathematical language and you don't really have to know LaTeX —it has a built-in editor for it. And the addition of Wolfram Alpha was great for chemistry and science."

"So it has really been a perfect fit all around."

— *Michael Maxwell, Director of Upward Bound Math and Science Program at Georgia State University*

"TutorsBox is an ideal tool to provide equal education opportunities to students across the world and we highly recommend it"

— *EdTechReview*
